 Order Form338

Dear Educators and Friends,

I would like to point out some of our latest and most innovative products, many which we've had engineered just this past year.

Robotics: A Conveyor Belt, Turntable and our new Motor Controller with USB (page 131).

Plastic Fabrication: We've developed a quality hot line plastic bender, matching angle bender, economical foam cutter and a vacuum former (pages 185, 186, 194).

STEMETER: A new device that times and collects data like no other! Ideal for your science and technology projects (page 20).

Labs: Visit our lab sampler pages for a listing of suggested labs appropriate for all grade levels (pages 11-15).

Kre8: Featuring hands-on, innovative engineering from England (page 39-43).

I would like to extend a thank you to each one of you for your orders and support on behalf of the entire KELVIN staff who work hard to ensure your satisfaction.

KELVIN®

Rocket Scientist™

Includes a rugged air-powered rocket launcher and adapters to launch different dia. paper rockets.

Economical to operate!
No Engines or CO₂ Cartridges Used—Save \$\$\$!

99

3

Marble Run

Marbles loop the loop, spin a wheel, travel along the tracks and round corners. Adjust the incline and position of parts to vary the speed of descent.
